WORK EXPERIENCE

HTML5 Game Developer

Beyondix Ltd. — Remote *(Based in Sofia, Bulgaria)*

Nov 2022 – Present

- Built browser-based games (live card games, roulette, plinko, slot games, crash games, and other RNG games) using Phaser and PixiJs, Redux, and modern JavaScript.
- Built reusable object pooling systems using TypeScript and PixiJS to improve memory usage and keep HTML5 applications running smoothly.
- Improved WebGL performance by reducing unnecessary rendering work and optimizing resource usage for better user experience.
- Created custom GPU shaders using GLSL (WebGL) and WGSL (WebGPU) to support different rendering technologies in PixiJS.
- Designed a reusable frontend architecture in TypeScript and PixiJS that powered multiple HTML5 games, allowing different game visuals while sharing the same core game logic.
- Worked closely with artists and designers to bring game ideas to life, discussing technical possibilities and implementing visuals and animations using PixiJS.
- Collaborated with QA during releases by explaining new features, sharing possible impact areas, and helping ensure proper testing coverage.
- Worked on features with a full understanding of how they fit into the overall product flow, considering the impact on gameplay.

Front-end Game Developer (part-time job)

Horizon Hive — Tacloban City, Philippines

Mar 2024 – Sep 2024

- Built and maintained Scratch-style games using HTML5 Canvas for web and mobile
- Built reusable UI components and animation systems in TypeScript using modular and game friendly architecture.
- Develop a web game page that integrates a native C++ game module into a web-based game using Web Assembly

SKILLS

- HTML5 and CSS/SCSS
- Javascript
- Typescript
- PixiJs
- PhaserJs
- WebGL
- WebGPU
- HTML5 Canvas
- ReactJs
- NextJs
- Git
- Spine Animations
- AI tools
- Websocket integration
- REST Integration

STRENGTHS

- Expert in Casino Game development
- Strong Knowledge with Game Architecture & Design pattern
- Expert in React and TypeScript
- Game Security & Compliance Awareness
- Strong knowledge of state management
- Realtime Data & API integration
- Quick to learn and adapt to new technologies

EDUCATION

Bachelor's Degree in Computer Science

ACLC College of Tacloban

2018- 2022

Graduate with awards

- Best in Computer Science Design
- Best in Java programming
- Best in C++ programming
